

REASONS TO REFER

A Program to help care for your patients and families affected by Alzheimer's disease and related dementias.

What is First Link®?

First Link is a program that connects individuals and families affected by dementia to opportunities for learning, community services and support throughout the course of the disease.

A First Link referral will save you valuable time and energy. It's simple—just fax or e-mail a referral form and First Link will take it from there.

- First Link will provide one on one and group support to your patients and families
- First Link will provide education about what to expect through the progression of the dementia and how to cope
- First Link makes sure individuals are connected to the appropriate resources in the community

Once the First Link is made, you will notice:

- **Fewer and less intense crisis** impacting your patients and families
- Patients and families will be **more knowledgeable and prepared** with enhanced coping skills

First Link – We are here to help.

If you would like more information about the First Link program,
